To solve Disk space is too low. Only 0.471GB left on /tmp.

Step 1: stop the jenkins service

 Cmd: sudo systemctl stop Jenkins

Step 2: Switch to root user and move to / location

Cmd: sudo su && cd /

Step 3: Unmount the /tmp directory

Cmd:

umount /tmp

Step 4: Editing "fstab" file and adding the following line

Cmd: sudo nano /etc/fstab

ONCE THE EDITOR OPENS ADD THE FOLLOWING
LINE AT THE BOTTOM

tmpfs   /tmp   tmpfs   defaults,size=2G   0 0

SAVE AND EXIT THE EDITOR

Step 5: Mounting the tmp directory

Cmd: sudo mount /tmp

Step 6: Start the jenkins service

Cmd: systemctl start jenkins
